PROFESSIONAL SUMMARY

Senior Product Designer with 10+ years delivering intuitive, high-impact products across SaaS, web, and mobile. Known for translating ambiguous business goals into clear, user-centered designs that measurably improve conversion, retention, and engagement. Early adopter of AI-augmented design workflows – applying Agentic AI, workflow automation, and AI-driven UX to accelerate research, persona development, PRD writing, and prototyping, while keeping strategic product decisions and design ownership firmly in hand.

CORE COMPETENCIES

Product Design & UX Strategy	Generative AI & LLM Interface Design
Design Systems & Component Libraries	SaaS Platform UX
High-Conversion Web & Landing Pages	UX Audits & Redesign
AI-Augmented Design Workflows	Conversational & Chat UX

Mobile-First & Responsive UX	Prompt-to-Prototype Workflows
AI-Assisted Prototyping (Figma + Code)	Remote Usability Testing

PROFESSIONAL EXPERIENCE

Founder & Senior Product Designer

Jul 2025 – Present

Kindly-Studio · Remote · kindly-studio.com

- Founded an AI-centric UX audit & website builder targeting pet-business owners, reducing their path from concept to high-converting site.
- Designed and deployed Agentic AI workflows automating lead research, UX content generation, email outreach, and social media scheduling.
- Applied AI-driven prototyping (Claude Code + Figma Make) to transform complex pet-business booking flows into conversion-optimized web experiences.
- Collaborated directly with small business founders to surface real user pain points, then validated solutions with lightweight usability testing.

Senior Product Designer

2021 – 2026

e27 / Optimatic · Remote

- Led end-to-end UX design for a high-growth startup platform serving 3M+ monthly user views, owning information architecture, task flows, and data-informed experiments.
- Redesigned onboarding and profile creation flows, increasing startup and investor profile completions by 35%.
- Designed AI-powered discovery features (NEXUS assistant) that reduced content discovery friction from 3 steps to zero, contributing to increased paid user conversions.
- Worked directly with founders, product leadership, and engineering to align UX decisions with business KPIs and technical constraints.
- Integrated AI-assisted tools throughout the design cycle – accelerating research synthesis, persona generation, and prototyping.

Mobile Designer – iOS & Android (UI/UX)

2019 – 2021

tawk.to · Remote

- Designed and shipped native mobile UX for a global live-chat SaaS platform

serving 6M+ active users across iOS and Android.

- Redesigned mobile onboarding and chat-widget flows, contributing to a 4.5→4.8 App Store rating increase.
- Owned end-to-end mobile UI – chat widgets, push notification flows, in-app messaging, and dashboard UX.
- Collaborated tightly with iOS and Android engineers to align component specs, interaction patterns, and edge cases following Apple HIG and Material Design guidelines.

Freelance Product Designer (UI/UX)

2012 – 2019

Various Startups • Remote & On-site

- Delivered end-to-end product design for 5+ startups across fintech, health-tech, loyalty, and marketplace verticals – including Rewardz, Lillypad, Mobikon, Brinq, and Holmusk.
- Owned UX research, wireframing, UI design, and developer handoff for mobile and web products from concept to launch.
- Designed loyalty program interfaces (Rewardz, Mobikon), health data dashboards (Holmusk), and marketplace flows (Lillypad, Brinq).
- Built and maintained design systems for multiple concurrent clients, ensuring consistency across platforms.

TOOLS & STACK

AI & Research

Claude, ChatGPT, Perplexity, NotebookLM, Gemini
Deep Research

Design & Prototyping

Figma, FigJam, Claude Code, Cursor, Framer

Documentation

Notion, Confluence, Linear (PRDs, specs, roadmaps)

Testing & Analytics

Hotjar, Google Analytics, Maze, remote usability testing

Automation

n8n, Make, Python scripting, API integrations

Available for remote roles worldwide · Open to full-time, contract, and fractional engagements
