

John Buladaco

Senior Product Designer (UI/UX) · AI-Augmented Design · SaaS & Web

📍 Remote-Philippines johnmbuladaco@gmail.com [LinkedIn](#) [john-buladaco.vercel.app](#)

Product designer with 10+ years of experience across SaaS platforms, web applications, and mobile products. Early adopter of AI-augmented design workflows – integrating generative AI tools into every phase from research through prototyping and automated dev handoff. Proven ability to own the full design journey: PRDs, user research, wireframes, UI design, design systems, and engineering collaboration.

Competencies

Generative AI & LLM Interface Design	SaaS Platform UX	Prompt-to-Prototype Workflows	Design Systems
AI-Assisted Prototyping (Figma + Code)	Mobile-First Responsive Design	User Research & Testing	
Cross-Functional Leadership			

Experience

Founder · Product Designer · AI Workflow Jul 2025 – Present

Kindly Studio – AI-Powered Web Design Automation

- Founded and designed an AI-powered platform automating web design agency operations – lead generation, email outreach, and website building
- Built 5 interconnected systems: Lead Gen (50+ qualified leads/day), Email Automation (A/B tested sequences), Conversion-First Website Builder (16 AI agents), Dashboard, and AI Orchestration
- Designed and shipped end-to-end: PRD → UX research → UI design → front-end development → deployment
- Achieved \$0.14/audit and \$0.67/build cost through AI pipeline optimization
- Increased homepage conversion scores from 34% to 75% average across client sites

Senior Product Designer · AI UX 2021 – 2026

e27 – Southeast Asia's Largest Startup Media & Intelligence Platform

- Led product design for the platform serving 1M+ monthly users across news, events, and startup intelligence
- Redesigned the AI discovery assistant (NEXUS), reducing user friction from 3 steps to zero and increasing items visible on open from 0 to 8+
- Increased user pageviews by 35% through improved content discovery and navigation redesign
- Grew paid subscriber base by 20% through optimized onboarding and paywall UX
- Increased startup and investor profile creation by 45% through simplified registration flows
- Collaborated directly with CEO and engineering team on product strategy and sprint planning
- Applied AI-augmented workflows: Figma + Claude Design for rapid prototyping, automated spec generation for dev handoff

Product Designer 2019 – 2021

tawk.to – World's Most Used Live Chat Software

- Designed features for the live chat platform serving 5M+ active users globally
- Contributed to increasing App Store rating from 3.8 to 4.6 through UX improvements to the mobile app
- Grew monthly active users by 25% through improved onboarding and feature discovery
- Led design for the knowledge base builder, ticketing system, and chat dashboard
- Collaborated with distributed engineering teams across 5 time zones

Freelance Product Designer 2012 – 2019

Various Startups – Rewardz, Lillypad, Mobikon, Brinq, Holmusk

- Delivered end-to-end product design for 15+ startups across fintech, healthtech, loyalty, and SaaS
- Designed mobile and web applications from concept through launch for seed to Series B companies
- Built and maintained design systems for cross-platform consistency
- Worked directly with founders and CTOs to translate business goals into shipped products

Tools & Stack

Design: Figma, FigJam, Framer	AI Design: Claude Design, Cursor, v0
Research: NotebookLM, Gemini Deep Research, Perplexity	Prototyping: Claude Code, Cursor, React/HTML
Testing: Hotjar, Maze, session recordings	Automation: n8n, Make, Python scripting

Dev Handoff: MCP-connected agents, Figma specs

tic: Vercel, Supabase, GitHub
